Attachment Two: Advertisements for High-Capacity Magazines for Glock 19	6
Attachment Three: Background on Glock’s History from the book <i>Making a Killing: The Business of Guns in America</i>	7

Introduction

The high-capacity Glock 19 pistol equipped with a 33-round magazine used in the alleged assassination attempt by Jared Loughner of Representative Gabrielle Giffords (D-AZ) that resulted in six deaths (including U.S. federal judge John M. Roll, and nine-year-old Christina-Taylor Green) and wounded 14 (including Representative Giffords), stands as a stark example of the trend toward increased lethality that defines today's gun industry. Since the mid-1980s, the gun industry has embraced increased firepower and capacity to resell the shrinking base of gun buyers in America.¹ In the 1980s, a very significant shift in gun design and marketing occurred: high-capacity semiautomatic pistols became the dominant product line. Formerly, the most popular handgun design was the revolver, most often containing six shots. In 1980, semiautomatic pistols accounted for only 32 percent of the 2.3 million handguns produced in America. The majority were revolvers. By 1991 this number had reversed itself with semiautomatic pistols accounting for 74 percent of the 1.8 million handguns produced that year.

¹ According to data from the National Opinion Research Center (NORC) at the University of Chicago, during the period 1972 to 2006 the percentage of American households that reported having any guns in the home dropped nearly 20 percentage points: from a high of 54 percent in 1977 to 34.5 percent in 2006. The NORC data also shows that during the period 1980 to 2006, the percentage of Americans who reported personally owning a gun dropped more than nine percentage points: from a high of 30.7 percent in 1985 to a low during the survey period of 21.6 percent in 2006. For more information, see the Violence Policy Center analysis *A Shrinking Minority: The Continuing Decline of Gun Ownership in America* (<http://www.vpc.org/studies/gunownership.pdf>).

U.S. Pistol and Revolver Production, 1978 to 2008

Year	Pistols	Revolvers
1978	463,426	1,413,651
1979	609,635	1,514,645
1980	764,451	1,605,192
1981	835,167	1,702,062
1982	853,444	1,775,179
1983	733,814	1,233,022
1984	814,234	766,317
1985	706,542	843,529
1986	692,977	734,650
1987	963,562	695,270
1988	991,011	754,711
1989	1,402,660	628,765
1990	1,376,399	462,496
1991	1,381,325	456,941
1992	1,216,174	309,044
1993	2,093,186	562,292
1994	2,014,336	586,450
1995	1,195,266	527,664
1996	985,533	498,944
1997	1,036,077	370,428
1998	960,365	324,390
1999	995,446	335,784
2000	962,901	318,960
2001	623,070	320,143
2002	741,514	347,070
2003	811,660	309,364
2004	728,511	294,099
2005	815,475	275,323
2006	1,021,260	382,069
2007	1,216,479	391,334
2008	1,387,129	431,753
Total	31,393,029	21,171,541

Semiautomatic pistols fire one round of ammunition for each trigger pull. (Highly regulated fully automatic machine guns that fire continuously with one trigger pull are generally unavailable to the general public.)

The dominance of the semiautomatic pistol greatly increased the firepower in civilian hands. Not only are semiautomatic pistols capable of rapid fire, they utilize high-capacity magazines and can be quickly reloaded. The combination of these features makes semiautomatic pistols efficient killing machines. As catalog copy for the Glock 19 states, "comparable in size and weight to the small .38 revolvers it has replaced, the...Glock 19 is significantly more powerful with greater firepower and is much easier to shoot fast and true."

Pistol Production By Caliber, 1979 to 2008

Year	To .22	To .25	To .32	To .380	To 9mm	To .50	Total

2008	195,633	14,454	40,485	278,945	421,746	435,866	1,387,129
Total:	7,549,096	4,206,842	1,211,732	3,972,443	7,618,439	6,352,226	30,910,778

Since 1979, 7,618,439 9mm pistols have been produced in the United States, making the 9mm the most popular pistol caliber produced in America during this period.

According to news reports, when Jared Loughner stopped to reload, Patricia Maisch—who had been waiting to have her picture taken with Representative Giffords—began wrestling an ammunition magazine from the shooter, preventing him from reloading, stopping the attack, and allowing the shooter to be pinned to the ground.

High-capacity semiautomatic pistols are the weapon of choice in many mass shootings. For example, in the April 2007 Virginia Tech shooting in which Seung-Hui Cho claimed 32 lives before taking his own, Cho was also armed with a high-capacity Glock 19 pistol.

GLOCK 19: THE 9x19 WORKHORSE

The compact version of the GLOCK 17, this is the preferred pistol of NYPD's 40,000 officers, and the standard weapon of United Nations Security personnel. Used by Executive Protection professionals worldwide, comparable in size and weight to the small .38 revolvers it has replaced, the 9x19 GLOCK 19 is significantly more powerful with greater firepower and is much easier to shoot fast and true.

AVAILABLE IN
OD GREEN IN
THE U.S. ONLY

GLOCK 23: VERSATILE FIREPOWER .40

GLOCK's compact .40, in the same "envelope" as the GLOCK 19, puts controllable big-bore power into an ideally sized package—substantial enough for police patrol, small enough for discreet and comfortable all-day concealed carry. A top choice of professionals for undercover work.

Source: *Shotgun News*, September 1, 2010

Attachment Three: Background on Glock's History from the book *Making a Killing: The Business of Guns in America*

Gaston Glock never made a gun before the mid-1980s. He began his career as an engineer, and in 1963 formed the company of Glock Ges.m.b.H in his hometown of Deutch-Wagram, near Vienna. The company started out making doorknobs and hinges, then moved into military and police hardware (grenades, entrenching tools, etc.), combining high quality synthetic materials and special steels. In 1980, the Austrian Army announced a competition for a new standard sidearm. Gaston Glock assembled a panel of experts and produced a prototype Glock Model 17 9-mm pistol, a distinctive combination of "polymers" (also known to most of us as "plastic") and steel. That pistol won the Austrian Army competition in 1982, and Glock was airborne on the wings of the ensuing contract.²⁸

Gaston Glock soon turned his eyes to the United States, opened Glock, Inc., "the company's United States beachhead" in the Atlanta, Georgia, suburb of Smyrna, and went after the American law enforcement market.²⁹

Glock's pursuit of U.S. law enforcement agencies was central to its deliberate strategy first to gain the prestige of such sales, and then to use them in its marketing campaign to sell to civilians. "It was a conscious decision to go after the law enforcement market first," Gaston Glock said. "In marketing terms, we assumed that, by pursuing the law enforcement market, we would then receive the benefit of 'after sales' in the commercial market."³⁰

The strategy worked so well that by 1995 the company was downplaying advertising and was chronically back-ordered.³¹ According to the company, in that year there were half a million Glock pistols in use throughout North America (meaning mostly in the United States). Twenty thousand of these were issued by law enforcement agencies—eighty percent of Glock, Inc.'s production was going to civilians and twenty percent to law enforcement.³¹

Glock's rise to a commanding position in the foreign handgun import market can be seen clearly in the Austrian handgun import data, starting in 1983, two years before Glock established its "beach-head" in the United States. (See Table 11).

Table 11.
Handgun Imports from Austria to the U.S., 1983 - 1996

<i>Year</i>	<i>Handguns From Austria</i>	<i>Austrian Share of Handgun Imports</i>
1983	668	1%
1984	2,291	1%
1985	3,769	1%
1986	21,118	4%
1987	13,500	3%
1988	37,750	6%
1989	96,621	15%
1990	120,277	18%
1991	115,430	18%
1992	164,034	16%
1993	184,283	16%
1994	209,820	15%
1995	202,259	23%
1996	213,837	30%

Source: U.S. Census Bureau, Foreign Trade Division

As will be seen, Glock's rise has been accompanied by controversy, including allegations that its guns are unsafe and its marketing practices to law enforcement too aggressive.
