

a small piece of AMERICAN FREEDOM

**JR15**®

**.22 LONG RIFLE**

safety - education - tradition

The JR-15 is a .22 Long Rifle that functions like a modern sporting rifle, however and most importantly its small size, lightweight rugged polymer construction and ergonomics are geared towards smaller enthusiasts.

**smaller · safer · lighter**

PATENTED SAFETY • MADE IN USA

Our goal was to build a truly unique shooting platform that a Parent or Coach can safely use to teach a young enthusiast. The JR-15 is smaller, weighs less, and has a patented safety.

.22 LONG RIFLE

## Patented Safety

Safety was so much at the forefront of our thought process that we developed and patented a tamper resistant safety that puts the adult in control of the firearms safety switch. The switch itself requires strength and dexterity to release.

When this is engaged, the standard safety switch on the rifle cannot be released.

Thus, adding a level of safety found on no other firearm of any size. Always remember that the most important safety feature of any youth firearm is the adult supervising all activity.

## Specifications
